

NEURO SYSTEM – 25 Questions

What does “syncope” mean?

1. Muscle twitching
2. loss of consciousness ✓
3. Memory loss
4. Nerve inflammation

2. Which condition involves sudden, uncontrolled electrical activity in the brain?

1. Epilepsy ✓
2. ALS
3. Parkinson’s disease
4. Vertigo

3. “Hemiparesis” means:

1. Complete body paralysis
2. Weakness on one side of the body ✓
3. Paralysis of both legs
4. Loss of coordination

4. Which test measures electrical activity in the brain?

- 1. EMG
- 2. EEG ✓
- 3. ECG
- 4. MRI

5. A “ruptured aneurysm” most commonly leads to:

- 1. Ischemic stroke
- 2. Hemorrhagic stroke ✓
- 3. Dementia
- 4. Multiple sclerosis

6. The part of the brain responsible for balance and coordination is:

- 1. Cerebrum
- 2. Brainstem
- 3. Cerebellum ✓
- 4. Thalamus

7. Which condition is characterized by progressive muscle weakness due to nerve degeneration?

- 1. Parkinson’s disease
- 2. ALS ✓

3. Epilepsy

4. Stroke

8. **“Vertigo” refers to:**

1. Severe headache

2. The sensation of spinning ✓

3. Losing memory

4. Tingling in hands

9. **Which nerve disorder is caused by uncontrolled diabetes?**

1. Peripheral neuropathy ✓

2. Myopathy

3. Neuralgia

4. Hydrocephalus

10. **What is “hydrocephalus”?**

1. Infection of the brain

2. Fluid buildup in the brain ✓

3. Brain tumor

4. Nerve damage in the legs

11. Medical procedure in which a needle is inserted into the spinal canal, most commonly to collect cerebrospinal fluid

- a. Epidural
- b. Nerve block
- c. Lumbar puncture**
- d. Ct scan

12. Traumatic brain injury that affects your brain function; can include headaches and problems with concentration, memory, balance and coordination is called:

- a. Vertigo
- b. Concussion**
- c. Epilepsy
- d. Parkinson's

13. Which term describes sharp, stabbing nerve pain along the course of a nerve?

A. Neuropathy

B. Neuralgia ✓

C. Myelopathy

D. Aphasia

14. Which term refers to spinal cord dysfunction?

A. Neuropathy

B. **Myelopathy** ✓

C. Neuralgia

D. Encephalopathy

15. Which condition is described as sudden weakness on one side of the body with facial drooping and slurred speech?

A. Migraine

B. **Stroke** ✓

C. Epilepsy

D. Neuralgia

16. Which condition is characterized by progressive cognitive decline affecting memory, judgment, and behavior?

A. Aphasia

B. **Dementia** ✓

C. Ataxia

D. Neuralgia

17. A patient has resting tremor, rigidity, and slow movements.

Which disease is most likely?

A. Alzheimer's disease

B. **Parkinson's disease** ✓

C. Multiple sclerosis

D. Stroke

18. An elderly patient presents with progressive memory loss, confusion, and personality changes.

Most likely diagnosis?

- A. Parkinson's disease
- B. Alzheimer's disease ✓**
- C. Stroke
- D. Epilepsy

19. A patient develops loss of movement and sensation in both legs after trauma.

What is the condition?

- A. Neuropathy
- B. Paraplegia ✓**
- C. Hemiplegia
- D. Myopathy

20. A patient has brief weakness and speech difficulty that resolves within one hour.

What is the most likely diagnosis?

- A. Stroke
- B. Transient ischemic attack (TIA) ✓**
- C. Migraine
- D. Seizure

21. The term for surgical operation of a portion of the skull:

1. Craniotomy ✓

2. Lobotomy

3. Neurotomy

4. Hematotomy

22. Which specialist treats brain and nerve disorders?

1. Cardiologist

2. Neurologist ✓

3. Pulmonologist

4. Endocrinologist

23. Which term refers to a partial or complete loss of sensation in a part of the body?

A. Tingling

B. Burning pain

C. Weakness

D. Numbness ✓

24. Which symptom describes a “pins and needles” sensation?

A. Numbness

B. Weakness

C. Tingling ✓

D. Paralysis

25. Which term refers to inability to coordinate voluntary muscle movements?

A. Tremor

B. **Ataxia** ✓

C. Paralysis

D. Neuralgia

CARDIO SYSTEM – 25 Questions

Which of the following refers to chest pain caused by reduced blood flow to the heart?

1. Myocarditis

2. Angina pectoris ✓

3. Arrhythmia

4. Endocarditis

2. 3. The medical term for a heart attack is:

1. CHF

2. MI ✓

3. CAD

4. CVA

3. Which test records the electrical activity of the heart?

1. MRI

2. Echo

3. ECG/EKG ✓

4. CT scan

4.. Which artery supplies blood to the heart muscle?

1. Femoral artery

2. Coronary artery ✓

3. Carotid artery

4. Aortic arch

5. “Atherosclerosis” refers to:

1. Thickening of lung tissue

2. Hardening of the arteries ✓

3. Kidney failure

4. Liver enlargement

6. Which procedure opens blocked coronary arteries using a balloon?

1. CABG
2. Angioplasty ✓
3. Pacemaker
4. Cardioversion

7. CABG stands for:

1. Coronary Artery Bypass Graft ✓
2. Cardiac Artery Broken Gland
3. Coronary Balloon Guide
4. Cardio Arrhythmia Base Gate

8. A patient with “irregular heartbeat” most likely has:

1. Atherosclerosis
2. Arrhythmia ✓
3. Pericardial effusion
4. MI

9. Which valve separates the left atrium from the left ventricle?

1. Aortic valve

2. Pulmonic valve

3. Mitral valve ✓

4. Tricuspid valve

10. Which diagnostic test uses ultrasound to visualize heart movement?

1. Echocardiogram ✓

2. ECG

3. X-ray

4. Stress test

11. A patient reports:

"I feel dizzy and almost faint when I stand up quickly."

This may indicate:

Hypertensive crisis

Orthostatic hypotension ✓

Tachycardia

Hyperglycemia

12. We may need to place a stent to keep the artery open."

A stent is best described as:

A medication

A surgical stitch

A small mesh tube inserted into an artery ✓

A heart valve replacement

13. “Atrial fibrillation” is best described as:

A blockage in coronary arteries

Inflammation of the heart muscle

An irregular, often rapid heart rhythm ✓

A valve infection

14. The term “ischemia” means:

Complete tissue death

Reduced blood flow to tissue ✓

Increased oxygen supply

Heart enlargement

15. Congestive heart failure (CHF)” refers to:

Sudden cardiac arrest

Infection of the heart valves

Hardening of arteries

The heart’s inability to pump blood effectively ✓

16. **“Heart murmur” usually refers to:**

Abnormal heart sound ✓

Irregular heartbeat

Blocked artery

Heart enlargement

17. **Which condition refers to “narrowing of a heart valve”?**

Regurgitation

Stenosis ✓

Prolapse

Occlusion

18. **“Tachycardia” is defined as:**

Heart rate below 60 bpm

Irregular rhythm

Heart rate above 100 bpm ✓

Weak pulse

19. **he provider says:**

“The patient has fluid buildup in the lungs due to heart failure.”

This condition is called:

Pleural effusion

Pulmonary edema ✓

Pneumonia

Bronchitis

20. The term “cyanosis” refers to:

1. Blue discoloration due to poor oxygen ✓
2. Yellow skin
3. Red rash
4. Severe swelling

21. “Edema” means:

1. Chest tightness
2. Fluid retention/swelling ✓
3. Fainting
4. Excess sweating

22. A patient says:

“I feel like my heart is skipping beats and then racing all of a sudden.”

This most likely refers to:

Stable angina

Heart murmur

Cardiac arrest

Palpitations ✓

23. Which chamber of the heart pumps oxygenated blood to the body?

Right atrium

Right ventricle

Left ventricle ✓

Left atrium

24. What does “bradycardia” mean?

Fast heart rate

Irregular heart rhythm

Slow heart rate ✓

Weak heartbeat

25. Which of the following medications is used to thin the blood?

1. Insulin

2. Anticoagulants ✓

3. Beta-blockers

4. Steroids

RESPIRATORY SYSTEM – 25 Questions

A patient with “shortness of breath” most likely has:

Dyspnea ✓

Apnea

Hemoptysis

Cyanosis

2. Which of the following describes sudden collapse of a lung?

1. Pleural effusion

2. Atelectasis

3. Emphysema

4. Pneumothorax ✓

3. Which condition is characterized by reversible airway obstruction, wheezing, and shortness of breath?

- 1. Asthma ✓
- 2. COPD
- 3. Pneumonia
- 4. Tuberculosis

4. Which imaging test is best for detecting fluid in the lungs?

- 1. ECG
- 2. Chest X-ray ✓
- 3. MRI
- 4. Ultrasound

5. Which of the following is a common symptom of COPD?

- 1. Night sweats
- 2. Chest pain radiating to arm
- 3. Chronic cough & shortness of breath ✓
- 4. Numbness in legs

6.A patient with sleep apnea experiences:

1. Continuous low oxygen during sleep ✓
2. Coughing up blood
3. Chest tightness only
4. Muscle weakness

7.. Which condition is characterized by progressive destruction of alveoli and difficulty exhaling?

1. Asthma
2. Emphysema ✓
3. Pneumonia
4. Pulmonary edema

8. “Bronchoscopy” is a procedure used to:

1. Check heart valves
2. Visualize airways ✓
3. Measure oxygen
4. Remove fluid from pleura

9.A patient has a positive Mantoux test. This indicates:

1. Tuberculosis exposure ✓
2. Pneumonia

3. Lung cancer

4. Asthma

10. **“Orthopnea” is difficulty breathing when:**

1. Sitting

2. Exercising

3. Lying down ✓

4. Standing

11. **Which test measures oxygen saturation in the blood?**

1. ECG

2. Pulse oximetry ✓

3. Spirometry

4. Chest X-ray

12. **“COPD” stands for:**

Chronic obstructive pulmonary disease ✓

Chronic oxygen pulmonary disorder

Cardiac obstructive pulmonary disease

Chronic obstructive perfusion defect

13. **“Wheezing” is best described as:**

A crackling sound in the lungs

Complete absence of breath sounds

A whistling sound during breathing ✓

Pain during breathing

14. **“Pneumonia” is:**

Air in the pleural space

Infection of the lungs ✓

Chronic airway narrowing

Fluid around the heart

15. **Which test measures lung function and volume?**

1. ECG

2. Echocardiogram

3. Spirometry ✓

4. Blood culture

16. **Which of the following is a symptom of pulmonary embolism?**

1. Sudden shortness of breath ✓

2. Gradual cough for months

3. Night sweats

4. Fever only

17. **“Bronchodilator” medications are used to:**

Reduce fluid in lungs

Open the airways ✓

Treat infection

Thin the blood

18. **“Intubation” means:**

Removing fluid from lungs

Measuring lung capacity

Giving oxygen through a mask

Placing a tube into the airway to assist breathing ✓

19. **“Hypoxia” refers to:**

High oxygen levels

Low oxygen levels in tissues ✓

High carbon dioxide

Normal breathing

20.. Which condition refers to “fluid in the lungs”?

Pulmonary edema ✓

Asthma

Bronchitis

Pneumothorax

21. A patient reports coughing up blood. The medical term is:

1. Hemoptysis ✓

2. Hematemesis

3. Epistaxis

4. Hematuria

22.A patient producing “thick mucus when coughing” is describing:

Hemoptysis

Sputum ✓

Edema

Aspiration

23. “Tachypnea” refers to:

Slow breathing

Painful breathing

Rapid breathing ✓

Irregular breathing

24, A patient who “inhales food or liquid into the airway” is experiencing:

Aspiration ✓

Inhalation therapy

Ventilation

Perfusion

:Ventilator” support is used when“ .25

The patient has high blood pressure

✓ The patient cannot breathe adequately on their own

The patient has a mild cough

The patient has chest pain only

GASTROINTESTINAL SYSTEM – 25 Questions

1. A patient with “heartburn” most likely has:
2. Gastritis
3. GERD (acid reflux) ✓
4. Appendicitis

5. Hepatitis

2. Which procedure uses a camera to examine the upper GI tract?

Colonoscopy

CT scan

Ultrasound

Endoscopy (EGD) ✓

3. Which organ is affected in cholecystitis?

1. Gallbladder ✓

2. Pancreas

3. Liver

4. Appendix

4. "Ascites" refers to:

Gas in the stomach

Fluid buildup in the abdomen ✓

Liver infection

Intestinal blockage

5. "Hepatitis" is:

Inflammation of the liver ✓

Infection of the stomach

Colon inflammation

Pancreatic failure

6. **“Jaundice” refers to:**

Red skin

Swelling of the abdomen

Yellowing of the skin and eyes ✓

Dark urine only

7. **“Dysphagia” refers to:**

Painful swallowing

Difficulty swallowing ✓

Vomiting blood

Loss of appetite

8. **“Proton pump inhibitors (PPIs)” are used to:**

Treat diarrhea

Reduce stomach acid ✓

Increase bile production

Treat constipation

9.. **“Laxatives” are medications used to:**

Stop vomiting

Reduce stomach acid

Treat liver disease

Soften stool and relieve constipation ✓

10. **“Nasogastric (NG) tube” is used to:**

Remove fluid or deliver nutrition to the stomach ✓

Measure lung capacity

Deliver oxygen

Test heart rhythm

11. **“Colonic polyp removal” is a procedure done during:**

Endoscopy

Colonoscopy ✓

ERCP

Gastroscopy

12. **“Antacids” are used to:**

Relieve stomach acid symptoms ✓

Increase bile production

Stop diarrhea

Treat pancreatic inflammation

13. **“H. pylori test” is done to:**

Check colon polyps

Measure bile production

Test for liver disease

Detect bacteria causing stomach ulcers ✓

14. **“Endoscopic biopsy” means:**

Taking tissue samples through an endoscope ✓

Removing polyps surgically

Measuring stomach acid

Administering IV medication

15. **“Cirrhosis” refers to:**

Inflammation of the pancreas

Stomach ulcer

Scarring of the liver ✓

Intestinal blockage

16. **“Bowel prep” before a colonoscopy means:**

Patient fasts completely

Cleaning out the intestines ✓

Administering IV fluids

Taking antibiotics

17. “Antiemetics” are medications that:

Stop nausea and vomiting ✓

Reduce stomach acid

Relieve constipation

Treat liver disease

18. Which organ produces bile?

Pancreas

Liver ✓

Stomach

Small intestine

19. “Crohn’s disease” is a type of:

Liver disease

Inflammatory bowel disease ✓

Stomach ulcer

Pancreatic disorder

20. Which of the following symptoms is considered an emergency in GI conditions?

1. Severe abdominal pain with vomiting blood ✓
2. Mild bloating
3. Occasional diarrhea
4. Constipation

21. Which imaging test is most commonly used to detect gallstones?

1. Ultrasound ✓
2. CT scan
3. MRI
4. ECG

22. "Lithotripsy" is a procedure to:

Remove liver cysts

Break stones into smaller pieces ✓

Place a stent

Treat ulcers

23. "Steatorrhea" refers to:

1. Fatty stools ✓
2. Bloody stools

3. Diarrhea

4. Vomiting

24. Hematemesis refers to:

1. Blood in stool

2. Blood in vomit ✓

3. Yellow skin

4. Abdominal swelling

25. “Probiotics” are used to:

Treat liver disease

Reduce stomach acid

Treat constipation only

Restore healthy gut bacteria ✓

ENDOCRINE SYSTEM

“Hyperglycemia” refers to:

Low blood sugar

High blood sugar ✓

Low hormone levels

High cholesterol

2. “Insulin” is a hormone that:

Raises blood sugar

Lowers blood sugar ✓

Controls blood pressure

Regulates calcium

3. “Thyroid gland” is located in the:

Neck ✓

Chest

Abdomen

Brain

4. “Hypothyroidism” means:

Overactive thyroid

Underactive thyroid ✓

Thyroid infection

Thyroid cancer

5. “A1C test” measures:

Daily blood sugar

Insulin levels only

Average blood sugar over time ✓

Kidney function

6. “Metformin” is primarily used to:

Lower blood glucose ✓

Treat hypothyroidism

Increase insulin resistance

Treat adrenal disorders

7. “Retinopathy” in diabetes affects the:

Kidneys

Eyes ✓

Nerves

Heart

8. “TSH” is a lab test used to evaluate:

Pancreatic function

Kidney function

Liver enzymes

Thyroid function ✓

9. **“Adrenal insufficiency” means:**

Excess cortisol

Inadequate cortisol production ✓

High insulin

Low thyroid hormone

10. **“Acromegaly” is caused by excess:**

Cortisol

Insulin

Growth hormone ✓

Thyroid hormone

11. **“Prolactinoma” is a tumor of the:**

Adrenal gland

Pituitary gland ✓

Thyroid gland

Pancreas

12. **“Graves’ ophthalmopathy” affects the:**

Eyes ✓

Kidneys

Lungs

Liver

13. **“Thyroidectomy” is:**

Removal of the thyroid gland ✓

Removal of adrenal glands

Biopsy of pancreas

Removal of pituitary

14 **“Moon face” and “central obesity” are signs of:**

Addison’s disease

Cushing’s syndrome ✓

Hyperthyroidism

Hypoglycemia

15. **Which hormone is produced by the adrenal cortex and helps in stress response?**

1. Cortisol ✓

2. Epinephrine

3. Insulin

4. Thyroxine

16. **“Hyperkalemia” means:**

- 1. Low potassium
- 2. High potassium ✓
- 3. Low sodium
- 4. High calcium

17. **“Glycosuria” refers to:**

- 1. Sugar in urine ✓
- 2. Protein in urine
- 3. Blood in urine
- 4. Ketones in urine

18. **Which endocrine gland is located above the kidneys?**

- 1. Pituitary
- 2. Thyroid
- 3. Adrenal ✓
- 4. Pancreas

19. **A patient with polyuria, polydipsia, and weight loss likely has:**

1. Diabetes mellitus ✓
2. Hypothyroidism
3. Addison's disease
4. Cushing's syndrome

20. **“ACTH” is a hormone produced by the:**

Thyroid

Adrenal gland

Pancreas

Pituitary gland ✓

21. **“Radioactive iodine therapy” is used to treat:**

Hypothyroidism

Hyperthyroidism ✓

Diabetes

Adrenal insufficiency

22. **The term “fasting blood glucose” means:**

Blood sugar after eating

Blood sugar after exercise

Blood sugar after not eating for several hours ✓

Random blood sugar

23. A doctor who specializes in diagnosing and treating hormonal disorders is called a:

Cardiologist

Endocrinologist ✓

Pulmonologist

Gastroenterologist

24. “Polyuria” refers to:

Frequent urination ✓

Painful urination

Blood in urine

Low urine output

25. A patient with “weight gain, fatigue, and cold intolerance” may have:

Hyperthyroidism

Hypothyroidism ✓

Diabetes

Hypertension

RENAL SYSTEM

“Hematuria” refers to:

1. Blood in urine ✓
2. Painful urination
3. Excess urine
4. Cloudy urine

2. “Pyelonephritis” is:

1. Inflammation of bladder
2. Infection of kidney ✓
3. Kidney stones
4. Urethral obstruction

. A patient who “wakes up multiple times at night to urinate” has:

5. Polyuria
6. Nocturia ✓
7. Dysuria
8. Retention

4. Which procedure is used to remove excess fluid and waste in kidney failure?

- 1. Catheterization
- 2. Ultrasound
- 3. Cystoscopy
- 4. Dialysis ✓

5. “Hydronephrosis” refers to:

- 1. Swelling of the kidneys due to urine buildup ✓
- 2. Infection of the bladder
- 3. Kidney stones
- 5. Urethral obstruction

6. Which test detects urinary tract infections?

- 1. ECG
- 2. Chest X-ray
- 3. Urine culture ✓
- 4. Blood glucose

7. “Uremia” refers to:

1. Excess potassium in blood
2. Accumulation of waste in blood ✓
3. Low sodium
4. High glucose

8. Which imaging test is commonly used to detect kidney stones?

1. Ultrasound ✓
2. MRI
3. CT angiogram
4. ECG

9. “UTI” stands for:

Ureteral tissue inflammation

Urinary toxin imbalance

Urinary tract infection ✓

Urethral tract injury

10. A patient who “cannot empty their bladder” may have:

Incontinence

Urinary retention ✓

Polyuria

Hematuria

11. **“Foley catheter” is used to:**

Measure blood pressure

Deliver oxygen

Drain urine from the bladder ✓

Remove kidney stones

12. **“Cystoscopy” is a procedure to:**

Examine the bladder ✓

Remove the kidney

Measure urine output

Treat infection

13. **Which specialist treats urinary system disorders?**

Nephrologist

Urologist ✓

Endocrinologist

Pulmonologist

14.BPH (benign prostatic hyperplasia)” refers to:

Prostate cancer

Enlarged prostate ✓

Kidney infection

Bladder stones

15.Lithotripsy” in urology is used to:

Remove the bladder

Treat infection

Insert a catheter

Break kidney stones ✓

16.A patient with “loss of bladder control” is experiencing:

Urinary retention

Incontinence ✓

Dysuria

Hematuria

17.Oliguria” refers to:

Reduced urine output ✓

Excessive urination

Painful urination

Night urination

18. **“Creatinine” is a lab test used to assess:**

Liver function

Kidney function ✓

Heart enzymes

Blood sugar

19.. **“Diuretics” are medications that:**

Reduce urine production

Increase urine production ✓

Treat infection

Dissolve stones

20. **“Cystitis” refers to:**

Kidney infection

Bladder inflammation ✓

Prostate enlargement

Ureter blockage

21. **Anuria” means:**

1. No urine output ✓
2. Low urine output
3. Painful urination
4. Blood in urine

22. Which condition can cause “foamy urine” due to high protein content?

1. Nephrotic syndrome ✓
2. Kidney stones
3. Pyelonephritis
4. Urethritis

23. “Dysuria” refers to:

1. Excess urine
2. Blood in urine
3. Painful urination ✓
4. Incomplete emptying

24. PSA test” is used to:

Measure kidney function

Screen prostate conditions ✓

Detect bladder infection

Measure urine output

25. **“Urine culture” is performed to:**

Measure kidney size

Identify bacteria causing infection ✓

Check blood sugar

Detect stones only

OB/GYN SYSTEM

1. A procedure that involves collecting cells from your cervix to test for cervical cancer in women.

- a. **Pap smear**
- b. CBC
- c. Hysteroscopy
- d. Otoscopy

2. Disease that is most often -- but not exclusively -- spread by sexual intercourse

- a. **STD**
- b. GAD
- c. PPI
- d. IBS

3. A condition where tissue similar to the lining of the womb starts to grow in other places, such as the ovaries and fallopian tubes

- a. Uterine fibroids
- b. Menopause
- c. **Endometriosis**
- d. Uterine polyps

4. A condition in which the ovaries produce an abnormal amount of androgen producing numerous small cysts (fluid-filled sacs) that form in the ovaries

- a. GAD
- b. **PCOS**
- c. GERD
- d. PTSD

5. Condition when a fertilized egg implants itself outside of the womb, usually in one of the fallopian tubes:

- a. Placenta previa
- b. **Ectopic pregnancy**
- c. Pre-eclampsia
- d. Miscarriage

6. All the following are types of STDs except:

- a. Chlamydia
- b. Gonorrhea
- c. **Eclampsia**
- d. Syphilis

7.The time in a woman's life when her period stops; usually occurs naturally after age 45

- a. Early menarche
- b. Menopause**
- c. Dysmenorrhea
- d. Menorrhagia

8.High blood sugar (glucose) that develops during pregnancy and usually disappears after giving birth.

- a. Insulin resistant diabetes
- b. Diabetes type 2
- c. Gestational diabetes**
- d. Pregnancy toxicity

9.Condition when your uterus can sag out of position

- a. Uterine fibroids
- b. Uterine cancer
- c. Uterine prolapse**
- d. Uterine hyperplasia

10.Surgical procedure by which one or more babies are delivered through an incision in the mother's abdomen

- a. Vaginal birth
- b. Hysterectomy
- c. Cesarean section**
- d. Assisted birth

11.Making a cut in the area between the vagina and anus during childbirth is called:

- a. Tracheotomy
- b. Episiotomy**
- c. Hysterectomy
- d. Lobectomy

12. A surgical procedure in which the cervix is opened, and a thin instrument is inserted into the uterus. This instrument is used to remove tissue from the inside of the uterus

- a. Tubal ligation
- b. Pap smear
- c. Colposcopy
- d. Dilation and curettage**

13. Exercises made to strengthen the pelvic floor muscles are called:

- a. Heimlich maneuver
- b. Braxton hicks
- c. Cardio exercise
- d. Kegel's exercise**

14.. Which hormone triggers ovulation?

- 1. FSH
- 2. LH ✓
- 3. Estrogen
- 4. Progesterone

15. Which imaging test is first-line for evaluating ovarian cysts?

- 1. Ultrasound ✓
- 2. MRI
- 3. CT scan

4. X-ray

16. Which condition involves non-cancerous growths in the uterus?

1. Fibroids ✓

2. Endometriosis

3. Ovarian cysts

4. PID

17.. Which procedure removes the uterus?

1. Hysterectomy ✓

2. Oophorectomy

3. Salpingectomy

4. Dilation & curettage

18. Which pregnancy complication involves high blood pressure and organ damage?

1. Ectopic pregnancy

2. Preeclampsia ✓

3. Gestational diabetes

4. Placenta previa

19. A procedure in which a small amount of amniotic fluid is removed from around the fetus to test for genetic disorders, infections, or fetal lung maturity is called:

Ultrasound

Chorionic villus sampling (CVS)

Amniocentesis ✓

Non-stress test

20. Which hormone is primarily responsible for maintaining pregnancy?

1. Progesterone ✓

2. Estrogen

3. LH

4. FSH

21. Which test measures fetal heart rate and contractions?

1. Ultrasound

2. Non-stress test (NST) ✓

3. Pap smear

4. Amniocentesis

22. "Polyhydramnios" means:

1. Excess amniotic fluid ✓
2. Low amniotic fluid
3. Premature rupture of membranes
4. Placental abruption

23.. Which hormone stimulates milk production after birth?

1. Oxytocin
2. Prolactin ✓
3. Estrogen
4. Progesterone

24, A patient presents with sudden abdominal pain and vaginal bleeding in late pregnancy. Most likely diagnosis:

1. Placental abruption ✓
2. Ectopic pregnancy
3. Fibroids
4. PID

25.A test that uses X-rays to examine breast tissue for early detection of cancer or other abnormalities is called:

Ultrasound

Mammogram ✓

MRI

Pap smear

Oncology

Neoplasm” refers to:

1. Infection
2. Inflammation
3. New and abnormal growth of tissue ✓
4. Cyst

2. Which imaging test is commonly used for breast cancer screening?

1. Mammography ✓
2. MRI
3. CT scan
4. Ultrasound

3. **“Metastasis” means:**

1. Initial tumor growth
2. Spread of cancer from one site to another ✓
3. Benign tumor
4. Infection

4. **“Biopsy” is:**

1. Surgical removal of tissue for examination ✓
2. Radiation therapy
3. Chemotherapy
4. Blood test

5. **“Hematologic malignancy” refers to:**

1. Skin cancer
2. Bone cancer
3. Blood cancers ✓
4. Brain tumor

6. **Which tumor marker is associated with prostate cancer?**

1. PSA ✓

2. CEA

3. CA-125

4. AFP

6. "Remission" in cancer means:

1. Cancer is worse

2. Symptoms reduced or gone ✓

3. Cancer is cured

4. Cancer spread

7. "Palliative care" aims to:

1. Improve quality of life, relieve symptoms ✓

2. Cure cancer

3. Prevent cancer

4. Diagnose cancer

8. "Cachexia" in cancer patients means:

1. Nausea only

2. Fatigue

3. Pain

4. Severe weight loss and muscle wasting ✓

9. The word “**benign**” means:

A. Aggressive cancer

B. Non-cancerous growth

C. Metastatic disease

D. Infectious tumor

10. **Adjuvant therapy** refers to:

A. First-line emergency treatment

C. Alternative medicine

B. Treatment after primary therapy to reduce recurrence

D. Diagnostic procedure

11. What is “**chemotherapy**”?

A. Radiation treatment

C. Surgical technique

D. Diagnostic imaging

B. Drug treatment to kill cancer cells

12. "Radiation therapy" uses:

A. Antibiotics

B. High-energy rays

C. Hormones only

D. Physical therapy

13. The term "oncologist" refers to:

A.. Cancer specialist physician

B. Radiologist

C. Surgeon only

D. Pathologist

14. "Leukemia" affects primarily:

A. Skin

B. Blood and bone marrow

C. Lungs

D. Liver

15. What does “**prognosis**” refer to?

A. Diagnosis of disease

B.. Treatment plan

C. Expected outcome or course of disease

D. Lab result

16. **Recurrence**” means:

A. Initial diagnosis

B. Cancer returning after treatment

C. Complete cure

D. Side effect of drugs

17. partial or complete removal of a limb is :

1. Amputation

2. Hip replacement

3. Chiropractor

4. internal fixation

18.. **A rapidly enlarging neck mass could suggest:**

1. Thyroid cancer ✓

2. Tonsillitis only
3. Skin allergy
4. Simple dehydration

19. **“Carcinoma” originates from:**

1. Connective tissue
2. Bone
3. Epithelial cells ✓
4. Nerve cells

20. **Which symptom is common in colorectal cancer?**

1. Blood in stool ✓
2. Rash
3. Fever
4. Shortness of breath

Dermatology

1. "Psoriasis" is characterized by:

1. Red, scaly patches on the skin ✓
2. Fluid-filled blisters
3. Pustules with pus
4. Skin necrosis

2. "Urticaria" is also known as:

1. Psoriasis
2. Hives ✓
3. Eczema
4. Rosacea

3. "Vitiligo" is a condition of:

1. Hair loss
2. Red rash
3. Skin depigmentation ✓
4. Blistering

4. Hair loss that can affect just your scalp or your entire body, and it can be temporary or permanent

- a. Vitiligo
- b. Lupus
- c. Alopecia**
- d. Acne

5. A **thickened, hardened area of skin** that develops due to repeated friction, pressure, or irritation.

- a. Callus**
- b. Moles
- c. Vitiligo
- d. Warts

6. A painful, pus-filled bump that forms under your skin when bacteria infect and inflame one or more of your hair follicles

- a. Rash
- b. Eczema
- c. Boil**
- d. Hives

7. What is cauterization?

- a. Surgical removal
- b. Burning of part of a body to remove or close off a part of it**
- c. Application of extreme cold to freeze and destroy abnormal tissue
- d. Grafting

8. A **localized collection of pus** that forms due to infection..

- a. Abscess**
- b. Callus
- c. Inflammation of the skin
- d. Scar

9. A **medical doctor who specializes in diagnosing and treating conditions of the skin, hair, and nails.**

- a. Neurologist
- b. Cardiologist
- c. Dermatologist**

d. Podiatrist

10. Shingles is caused by:

- a. Herpes simplex
- b. Varicella zoster**
- c. HPV
- d. Gonorrhea

11. **What is eczema?**

- A. Bacterial skin infection
- B. Chronic inflammation of the skin**
- C. Skin cancer
- D. Viral disease

12. **Fluid-filled pocket on the skin refers to:**

- A. Solid lump
- B. Dry patch
- C. Blister**
- D. Scar tissue

13. **A genetic condition with little or no pigment in skin, hair, and eyes refers to:**

- A. Skin infection
- B. Albinism**
- C. Cancer
- D. Allergy

Answer: B

14. What is a mole (nevus)?

- A. Malignant tumor
- B. Benign growth of pigmented skin cells
- C. Infection
- D. Rash

Answer: B

15. Application of extreme cold to freeze and destroy abnormal tissue refers to:

- A. Surgical removal
- B. Burning of part of a body to remove or close off a part of it
- C. **Cryotherapy**
- D. Grafting

16. Contact dermatitis is triggered by:

- 1. Allergens or irritants ✓
- 2. Bacteria
- 3. Hormones
- 4. Genetics

17. Biopsy in dermatology is used to:

- 1. Treat skin infection

2. Remove warts
3. Diagnose skin lesions ✓
4. Reduce inflammation

18. Rosacea" typically affects:

1. Scalp
2. Face ✓
3. Hands
4. Feet

19. A contagious skin infection characterized by red, ring-shaped rash refers to:

- A. Psoriasis
- B. **Ringworm**
- C. Albinism
- D. Urticaria

20. "Hyperpigmentation" refers to:

1. Loss of skin color
2. Darkening of the skin ✓
3. Redness

4. Blistering

21. "Hypopigmentation" refers to:

1. Light patches on the skin ✓
2. Dark spots
3. Rash with pus
4. Red scaly patches

22. A patient has itchy, red, raised wheals after eating seafood. This is most likely:

1. Eczema
2. Urticaria ✓
3. Psoriasis
4. Rosacea

23. Topical corticosteroids are mainly used to:

1. Kill bacteria
2. Reduce inflammation ✓
3. Treat fungal infections

4. Stimulate hair growth

24. A patient presents with blistering on lips and mouth after stress.
Likely diagnosis:

1. Cold sores ✓

2. Canker sores

3. Impetigo

4. Eczema

25. Red, inflamed skin caused by overexposure to the sun refers to:

A. Acne

B. **Sunburn**

C. Eczema

D. Infection

EMERGENCY / ER

1. A patient arrives with sudden chest pain radiating to the left arm. Likely diagnosis:

1. Myocardial infarction ✓

2. Asthma

3. Stroke

4. Pneumonia

2. "Dyspnea" means:

1. Chest pain

2. Shortness of breath ✓

3. Dizziness

4. Cough

3. A patient presents with a severe allergic reaction, swelling of face and throat. Immediate action:

1. Giving epinephrine ✓

2. Give acetaminophen

3. Apply ice

4. Start IV fluids

4. Hemorrhage" refers to:

1. Infection

2. Swelling

3. Fracture

4. Excessive bleeding ✓

5. Tachycardia” means:

1. Fast heart rate ✓

2. Slow heart rate

3. Chest pain

4. Shortness of breath

6. Sepsis” is defined as:

1. Heart attack

2. Stroke

3. Life-threatening organ dysfunction due to infection ✓

4. Asthma

7. Hypoxia” means:

1. Low oxygen in the blood ✓

2. High blood pressure

3. Low heart rate

4. Fever

8. Cardiac arrest” is:

1. Heart rate too fast
2. Heart stops beating effectively ✓
3. Chest pain only
4. Shortness of breath

9.Hypovolemic shock” results from:

1. Severe blood or fluid loss ✓
2. Heart failure
3. Infection
4. Allergic reaction

10.CPR” stands for:

1. Cardiac Pulmonary Resuscitation
2. Cardiopulmonary Resuscitation ✓
3. Central Pulse Response
4. Critical Patient Rescue

11.Anaphylaxis” is:

1. Mild allergic reaction
2. Heart attack
3. Seizure

4. Severe, potentially life-threatening allergic reaction ✓

12. "Tachypnea" means:

1. Slow breathing
2. Fast breathing ✓
3. Irregular heartbeat
4. Low blood pressure

13. Asthma attack" emergency treatment includes:

1. Inhaled bronchodilator ✓
2. Antibiotics
3. Surgery
4. Insulin

14. Syncope" is:

1. Fainting ✓
2. Seizure
3. Stroke
4. Heart attack

15. In emergency interpreting, the MOST important principle is:

- A. Paraphrasing freely
- B. Adding explanations from your own knowledge
- C. **Accuracy and completeness**
- D. Shortening the message

16. Bluish discoloration of lips or skin due to lack of oxygen refers to:

- A. Redness
- B. **Cyanosis**
- C. Rash
- D. Burn

17. Persistent vomiting and inability to keep fluids refers to:

- A. Hunger
- B. **Dehydration**
- C. Allergy
- D. Fatigue

18. Involuntary shaking or convulsions refers to:

- A. Tremor
- B. **Seizure**
- C. Fatigue
- D. Paralysis

19. Complete inability to move a part of the body refers to:

- A. Weakness
- C. Pain
- D. Swelling

Paralysis

20. Sudden severe headache (worst ever) refers to:

- A. Tension headache
- B. **Subarachnoid Hemorrhage**
- C. Migraine
- D. Sinusitis

Ear and eye

1. Sudden loss of vision in one eye refers to:

- A. Conjunctivitis
- B. **Retinal Detachment**
- C. Dry eye
- D. Headache

2. Red eye with itching and discharge is most likely:

- A. Glaucoma
- B. **Conjunctivitis**
- C. Cataract
- D. Migraine

3. A condition where the optic nerve is damaged due to high intraocular pressure is:

- A. Cataract
- B. **Glaucoma**
- C. Conjunctivitis
- D. Strabismus

4. Gradual loss of vision with cloudy lens refers to:

- A. Conjunctivitis
- B. **Cataract**
- C. Retinal detachment
- D. Stroke

5. Foreign body sensation in the eye most likely indicates:

- Migraine
- Cataract
- Glaucoma

Corneal Abrasion

6. Sudden ear pain with fever suggests:

- A. Allergy
 - B. **Otitis Media**
 - C. Tinnitus
 - D. Dry eye
-

7. Ringing in the ear without external sound is:

. **Tinnitus**

Vertigo

. Infection

Headache

8. Spinning sensation and imbalance indicates:

A. Migraine

B. **Vertigo**

C. Fever

D. Rash

9. Ear discharge with pain usually indicates:

A. Allergy

B. **Otitis Externa**

C. Stroke

D. Diabetes

10. **Surgical repair of the small bones in the middle ear to improve hearing is:**

A. Myringoplasty

B. **Ossiculoplasty**

C. Cochlear implant

D. Ophthalmoscopy

11. Eye pain with redness and sensitivity to light may indicate:

- A. Conjunctivitis
- C. Cataract

Uveitis

- . Dry eye
-

12. Excessive tearing and itchy eyes suggest:

- A. Glaucoma
 - B. **Allergic Conjunctivitis**
 - C. Stroke
 - D. Cataract
-

13. **Surgical removal of the cloudy lens in the eye and replacement with an artificial lens is called:**

- A. **Cataract Surgery**
 - B. Strabismus correction
 - C. Tympanoplasty
 - D. Vitrectomy
-

14. **A test used to measure hearing ability using sound tones at different frequencies is:**

- A. Otoscopy
 - B. **Audiometry**
 - C. Fundoscopy
 - D. Tympanoplasty
-

15. Blurred vision with headache may indicate:

- A. Allergy
- B. **Migraine**

C. Infection

D. Earwax

16. Feeling of pressure in the ear is often due to:

Eustachian Tube Dysfunction

Stroke

Cataract

Rash

17. Diagnostic procedure that employs the use of mydriatic eye drops to dilate or enlarge the pupil in order to obtain a better view of the fundus of the eye

- a. Angiopathy
 - b. Otoscopy
 - c. **Fundus examination**
 - d. EEG
-

18. Painful swelling of eyelid is:

A. Cataract

B. **Stye**

C. Glaucoma

D. Migraine

19. Specialist who treats eye diseases and perform eye surgeries :

- a. Optometrist
 - b. **Ophthalmologist**
 - c. Pulmonologist
 - d. Neurologist
-

20. Sudden dizziness with hearing changes suggests:

- A. Stroke
 - B. **Meniere Disease**
 - C. Rash
 - D. Fever
-

21. What is the medical term for crossed eyes?

- a. **Strabismus**
 - b. Cataract
 - c. Glaucoma
 - d. Cauterization
-

22. A medical condition which may result in blurred or no vision in the center of the visual field

- a. **Macular degeneration**
 - b. Strabismus
 - c. Retinal detachment
 - d. Sty
-

23. Condition in which you can see objects near to you clearly, but objects farther away are blurry:

- a. Hypermetropia
 - b. **Myopia**
 - c. Cataract
 - d. Blurry vision
-

24. Define myringoplasty?

- a. Surgical repair of an aneurysm
- b. Surgical repair of blood vessels
- c. Surgical repair of heart valve
- d. **Surgical repair of eardrum**

25. What is a cochlear implant?

- a. A battery-powered electronic device designed to improve your hearing
 - b. A small electronic device that electrically stimulates the auditory nerve for hearing**
 - c. Device used to maintain the rhythm of the heart
 - d. Device used for visual examination of the ear
-
